General description	
Part number	MR07
Part name	Hammer Probe

The FLIR MR07 Hammer Probe expands the functionality of your FLIR moisture meter by allowing you to take measurements in the subfloor through carpet, hardwood flooring, and hard materials that are difficult to penetrate with a standard pin probe.

FLIR's new insulated pins are smaller in diameter—requiring minimal force to drive the pins into a surface—resulting in less impact to the material. The sandblasted, hardened-steel pins with a single-piece design prevent bending and create an improved bonding surface for the abrasion-resistant insulation. The insulation extends all the way to the connection to the probe, so even if you drive the pins all the way into the wall cavity, the drywall will not affect the measurement.

- Insulated pins designed for increased durability.
- Rubberized ergonomic grips reduce slippage.
- Detachable cord with durable BNC connection.
- Pins included: 2 pairs of 2 in. pins.
