

September 19, 2025

Dear Valued Customer,

Fluke strives to provide improved workflows and solutions to our customers everyday, and pursuant to that goal, we are excited to announce a product update to streamline Thermal Imaging workflows.

Effective immediately, the PTi120 Pocket Thermal Imager and TiS20+ / TiS20+ MAX Thermal Imager will consolidate their Wifi connectivity options to hotspot connectivity, removing direct connection to the Fluke Connect Cloud. Fluke is simultaneously announcing the release of the new Fluke Connect Mobile App, for both iOS and Android.

These exciting product developments to both the Fluke Connect Mobile App and Fluke Thermal Imaging line will streamline connectivity, enhance workflow outputs, optimize technician analysis, and improve global data security.

Should you have any questions, please reach out to Fluke Technical Support, your local Fluke representative, or an authorized Fluke distributor.

Sincerely,

Yinzi Wolin
Thermal Imaging, Business Unit Lead
